EDUCATION

B.Eng., Software Engineering — Egyptian Chinese University (ECU)

Expected Jun 2029

GPA: 3.4 / 4.0 | Coursework: Data Structures, OOP, Digital Logic, Computer Networks, Operating Systems

TECHNICAL SKILLS

Languages: C++, C, Embedded C, SQL

Embedded & IoT: ESP32, Arduino | **Protocols:** I2C, OneWire, TCP/IP

Cybersecurity Tools: Wireshark, Zenmap

Automation & DevOps: n8n, Microsoft Power Automate, Git/GitHub, Linux, VS Code, Proteus

WORK EXPERIENCE

Software Automation Specialist — Spinners Creative Agency

Jul 2024 – Jul 2025

Dubai, UAE (Remote)

- Engineered **5** AI-powered outreach and reporting pipelines using **n8n** and **Microsoft Power Automate** integrated with Google Sheets and Lemlist, eliminating **3+ hrs/week** of manual data management and improving CRM accuracy across international client accounts
- Converted **6** international clients from a 100+ prospect pipeline by diagnosing automation bottlenecks and delivering tailored proposals — achieving **~6%** conversion rate vs. **~2%** industry average (**3×** benchmark)

LEADERSHIP & VOLUNTEERING

Vice Head of HR — IEEE ECU Student Branch

Jun 2025 – Present

Cairo, Egypt

- Built an automated candidate-scoring pipeline in Google Sheets with structured rubrics, processing **150+** applicant interviews and achieving **~40%** acceptance rate across committee selections
- Delivered structured HR training to **50+** committee members on recruitment frameworks and professional development; led branch's largest event drawing **75+** attendees per session

ACHIEVEMENTS

National Finalist, Software & AI Track — DIGITOPIA (Ministry of Communications, Egypt)

Nov 2025

- Developed a VR application digitizing Egyptian antiquities as interactive 3D models, advancing to national finals out of **25,000+** applicants — completing **Phase 2** of Egypt's premier national tech competition

Member of the Season — IEEE ECU Student Branch | Awarded for outstanding contribution to branch initiatives, teamwork, and community impact

Certificate of Appreciation — ECU Faculty of Engineering & Technology | Recognized for active involvement in organizing faculty-level events

Enactus Egypt | Recognized for dedication to entrepreneurial action and social impact projects

PROJECTS

Track Watch | C/C++, Embedded C, I2C, OneWire, ESP32 [GitHub ↗](#)

- Architected an **ESP32** IoT health monitor integrating MAX30102, MPU-6050, and DS18B20 sensors over I2C/OneWire at **~100ms** polling cycles, achieving **±2 BPM** measurement accuracy with real-time OLED rendering
- Validated firmware stability through **8-hour** continuous stress testing with **zero** system crashes, memory faults, or sensor dropouts — shipping simultaneous pulse oximetry, motion, and temperature monitoring on a single low-power device

Hospital Management System | C++, Qt6, OOP [GitHub ↗](#)

- Led 7-member team building desktop hospital application covering patient registration, appointment scheduling, medical records, and financial billing — designed complete GUI from Figma prototype to Qt6 implementation
- Architected unified backend connecting 5 independent modules with file-based persistence, achieving zero scheduling conflicts across 100+ simulated workflows and sub-200ms UI response across all CRUD operations

ATM System Simulation | C++, OOP [GitHub ↗](#)

- Led architecture as team lead of 3, designing **10+** OOP classes across auth, transaction, and account modules with full input validation covering overdrafts, auth failures, and malformed inputs — validated across **15+** edge cases

CERTIFICATIONS

Introduction to Cybersecurity — Cisco Networking Academy (Apr 2026)

Network Security & Fundamentals — ITI / Mahara-Tech (Mar 2026)

Computer Network Fundamentals — ITI / Mahara-Tech (Mar 2026)

Introduction to Critical Infrastructure Protection (ICIP) — OPSWAT Academy (Feb 2026)

Overview of IoT Technologies (CRA Training Program) — Huawei ICT Academy (Aug 2025)

Overview of AI — Huawei ICT Academy (Aug 2025)

LANGUAGES

Arabic (Native) | **English** (Upper-Intermediate / B2+)
